5 Courses

Hydrocarbon Exploration and Production

From Wellhead to Refinery: Midstream Oil and Gas Processing

Natural Gas Production and Processing

AI & ML Applications in Oil and Gas Industry

Utilities, Safety & Environmental Care in Oil & Gas Industry

has successfully completed the online, non-credit Specialization

Petroleum Engineering with AI Applications

Gain a comprehensive understanding of upstream and midstream operations combined with AI in the oil and gas industry. Explore the entire field life cycle, from exploration to transportation and storage. Learn hydrocarbon reservoir assessment, drilling techniques, and oil recovery methods including water flooding and gas injection. Understand midstream operations, natural gas extraction, and utilities management. Emphasize safety, environmental sustainability, and apply AI to optimize decision-making and workflows. Enhance your skills at the intersection of traditional petroleum engineering and cutting-edge AI technologies for increased efficiency and productivity in the industry.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
